New Polaris Sportsman '02-'04 Ignition upgrade

Featured on **ATV&SXS**

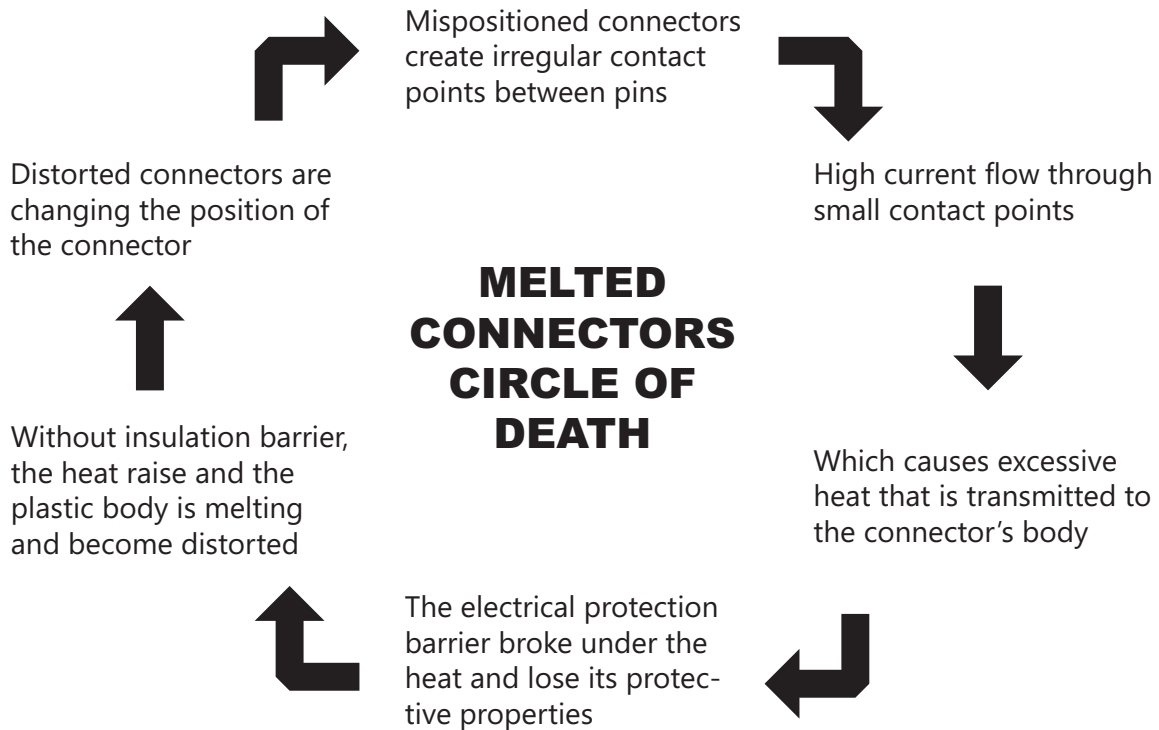

Half-priced Ignition upgrade

With 1M units sold, the Polaris Sportsman is one of the most popular ATV. But the 2002-2004 generation was plagued with an ignition system failure. The AC powered ignition was responsible for most of the failures.

Starting mid-2004, Polaris upgraded their ignition systems with a more reliable DC one. Owners of 100 to early 104 were able to upgrade their Sportmans with a service Polaris

CONNECTOR'S CIRCLE OF DEATH

Your connectors are melting ? Here's why :

The solution to your problem:

- Inspect each connector before replacing any electrical components
- If corrosion is just beginning, use sand paper to clean the terminals (pins) this will create a better contact and eliminate problems in the future..
- If the connector is melted or if the corrosion on the terminals is too severe, remove all connectors and terminals and replace them with one of our brand new connector kits (includes male & female connector's pins).
- A corroded terminal/pin is one of the most frequent causes for melted connectors. This may result in electrical failure of the ignition or charging systems parts. RMSTATOR has made this task easy just use our ratchet crimping tool (Part #RM10002) and high intensity soldering station (Part# RM10003) and one of our connector kits (Parts #RM14***)
- Always use high quality dielectric grease that resists to high temperature on all electrical connections to avoid future problems.

DIELECTRIC GREASE

RM10005

\$0.99

TOOLS

Professional grade Ratchet Crimping Tool – 9” (230 mm)

RM10002

Position 1 : 0.5 to 1.0 mm

Position 2 : 1.5 to 2.5 mm

Position 3 : 4.0 to 6.0 mm

Also works with insulated connectors.

Direct fit & universal Connectors

RM14***

We have a wide selection of OEM replacement connectors always offering the male & female connectors with the appropriate terminals and hardware.

Often the opposite side connector of your vehicles main harness is melted/damaged and the terminals are rusted, corroded and do not make proper contact. If you are not vigilant by verifying this you are increasing your risks of repeat failure of the parts you have just replaced.

Connectors are simple to replace if you are well equipped, all you need is a crimping tool and good soldering station. We also strongly suggest using dielectric grease in most of your connectors, assuring proper protection of your terminals.

Digital Soldering Station 939D - Professional Grade

RM10003

Temperatures up to 70 watts

Adjustable digital temperature controlled by reliable closed-loop sensor for super-fast temperature rising and keeping steady.

Powerful soldering iron with top quality Japanese made ceramic heating element.

Slender, lightweight ergonomic iron handles.

Large LED Displays to show real-time temperatures. Easy Operate.

Compact design takes up less bench space.

Inclus avec la station

939D Soldering Station

Powerful Iron (70W)

Metallic Support

Specifications

Power : 70 W, 110V AC (For use in North America, Approved CE)

Temperature Range : 100-480 degrees Celcius

Temperature Stability : +/- 2 degrees Celcius

RMS RACING

RMSTATOR now has stator manufacturing capabilities

Designed with racing teams, designed, manufactured with quality materials and custom winding configurations, our stators at RMS RACING can provide more output, more performance with unequalled reliability.

Because losing is just not an option!

Georges Samson, President Samson Racing / Circuit Pro Tour 2013

Managing a winning racing team that competes on a high caliber circuit like the Pro Tour circuit brings real challenges. Organization, show quality, vehicle performance... Everything counts in a world where 2 second makes all the difference.

This is why I can count on RMS RACING to support our racing team with their high performance race ready starters. Their experience in understanding, diagnosing, repairing and now manufacturing starters for power sport vehicles means everything when trying to produce more horsepower at infernal RPMs

RMS RACING technicians know what a racing team needs: They know how to identify faulty ignition systems, suggest creative solutions and reach higher performance levels by continually following-up on their products performance and improving it.

At RMS RACING, it all about the quality of the product and the people, they are the power in power sports!

www.cpctracing.ca | www.facebook.com/CPTracing | www.facebook.com/samson.racing

Philippe Soucy, snowmobile racer ZoneXtreme.net / Snowmobiles.ca

When you embark on an adventure like snowmobile drag racing on water, it's the start of a long project that necessitates a lot of sweat blood and tears oh and lots of money! One of the most important things in this sport is to surround your self with good people & sponsors.

I had the chance to find both with RMSTATOR and they where capable of offering the right solution to optimize the ignition for my sled. A small business in Coaticook, Quebec, Canada owned by 2 passionate power sport enthusiasts saw the opportunity in this segment of the market and decided to open up shop. Ambitious & Generous, RMSTATOR encourages new racers and race teams by supporting different projects with time, parts and money. These guys know how to listen and then diagnose the problem with you, then using the equipment and experience they have they are able to deliver a high performance & reliable product. I can assure you that Sean and his teams have answered all my questions quickly and efficiently. In the racing world performance is not synonym of reliability especially in electrical parts. Meticulous Professionals with over 20 years experience, the constant following up definitely shows the level of interest RMSTATOR has in the Racing world and in their teams. They went above and beyond what was required to get the job done! **I strongly suggest you try them, if you wanna win!!!!**

Thanks

RMS LABS

ELECTRIFYING INNOVATIONS!

Our clients have access to our newly implemented electro mechanical laboratory and state of the art testing equipment to help him resolve your hard-to-find electrical issues.

If you encounter a specific problem with an electrical part that has no actual solution or for which the solution is obsolete, please submit the problem to our team. Once reviewed by the staff in our technical department we will evaluate the possibility of offering you a tested, cost effective, reliable solution.

<http://csc.rmstator.com>

Challenge us to resolve your trickiest electrical issue!

REPAIR SERVICES : STATORS & REGULATORS

For stators and voltage regulators rectifiers

Original OEM part way too expensive? Hard to find or obsolete?

Ask for our stator or voltage regulator rectifier repair service!

With over 20 years of experience with electrical parts and state of the art testing equipment we can :

- Give you a true diagnosis by testing on our bench.
- Identify the right part to replace
- Repair, custom build and improve the defective part to make it work again
- Offer a one year limited warranty on all repairs

98.7% of our repairs are diagnosed and repaired with 48 hours. (excludes shipping time)

Submit your repair request in our new virtual Customer Service Center:
